Figure 1: AC7922 QFN96 Pin Definition. The diagram illustrates the pin configuration for the AC7922 QFN96 package. The package is a square with pins numbered 1 to 96. The pins are organized into four groups: 1-24 (left), 25-48 (top), 49-72 (right), and 73-96 (bottom). Each pin is labeled with its function, such as VDD, GND, I2C_SDA, I2C_SCL, and various LED outputs (LED1, LED2, etc.). A detailed pin list is provided at the bottom, showing the pin number, package pin number, and the corresponding function. The diagram also includes a small schematic of the package's internal structure and a note about the package's dimensions and mounting.
